

Migraine Management in Otolaryngology Mentorship Opportunities with Dr Michael Teixido

AAO-HNS Academy Sponsorship through the Academy Mentor Program

Enroll as a Mentee in the AAO-HNS [mENTorConnect](#) program and request a mentorship relationship with Dr Teixido. Dr Teixido will assess your current migraine knowledge and suggest some preliminary review of printed information and review of online videos. He can then, for a period of 6 months, be on hand to help with clinical decision making on individual patients who you think may benefit from migraine management. mENTorConnect is an exclusive benefit for Members of the AAO-HNS.

Migraine Management Clinical Observership for Otolaryngologists

A 2-day observership is offered in Wilmington, Delaware, USA for Otolaryngologists who would like to become more familiar with migraine management. If you would like to feel comfortable prescribing preventive medications and would like to see all aspects of migraine management (all the way to nerve blocks and Botox), I would suggest you come spend a day or two with me sometime in Wilmington, Delaware. You will see how we choose and exactly how we manage migraine medications. More importantly you will see lots of patients who are being treated successfully in this way for symptoms which may be receiving other care in your home practice. Your initial experience can be extended through the AAO-HNS sponsored mENTorConnect program so you can maintain a clinical guidance relationship with Dr Teixido. The closest airport is Philadelphia International (25 minutes away). There is no fee. To apply please leave a message for Dr Teixido at +1 302 998-0300
