

### **Migraine World Summit: In-Depth Patient Information for Migraine Patients**

The highest quality expert information for patients with migraine that is available anywhere on the internet comes from the Migraine World Summit. The Migraine World Summit collects interviews every year from migraine experts on all aspects of migraine disease. These interviews are collected at headache meetings around the world and are shown every March as a special event. The experts who are interviewed are answering questions designed to help patients understand all aspects of migraine disorders and their treatments. By reading the comments you will see these interviews are often life changing for the patients who see them.

The Migraine World Summit can be accessed by clicking the following link:  
<https://www.migraineworldsummit.com/>

You will need to register with a user name and password. Registering will give you 10-day access to all of the talks presented at the 2019 Migraine World Summit.

The interview on Dizziness and Balance Disorders Associated with Migraine, including vestibular migraine, was delivered by Dr. Teixido himself. You can find it on Day 3 of the Summit. If you have seen Dr. Teixido and have been given a diagnosis of vestibular migraine you will hear a great deal of useful information about your disorder that he did not have an opportunity to introduce you to during your visit with him. Please take advantage of the opportunity to access this first quality information about migraine disease and pass it on to your friends.
